

DWARF DRAGONSEEKER STATUE

3D PRINTING & ASSEMBLY INSTRUCTIONS

CONTENT

The Dragonseeker statue model is divided into three parts, so that it can be printed straightforward and without the need for support structures. Each part is delivered in its own STL file

Part 1: aowps01_bottom.stl

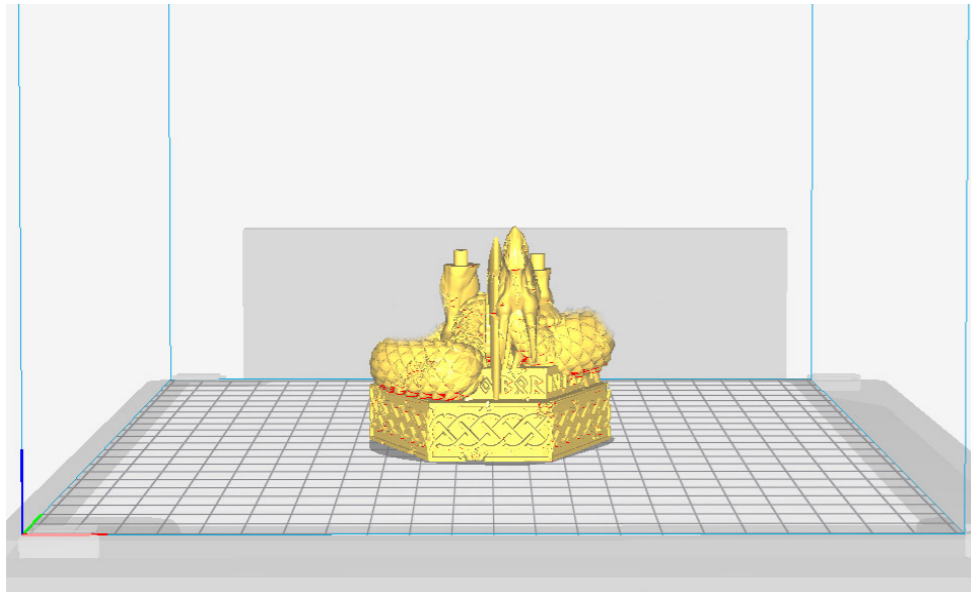

Part 2: aowps01_middle.stl

Part 3: aowps01_top.stl

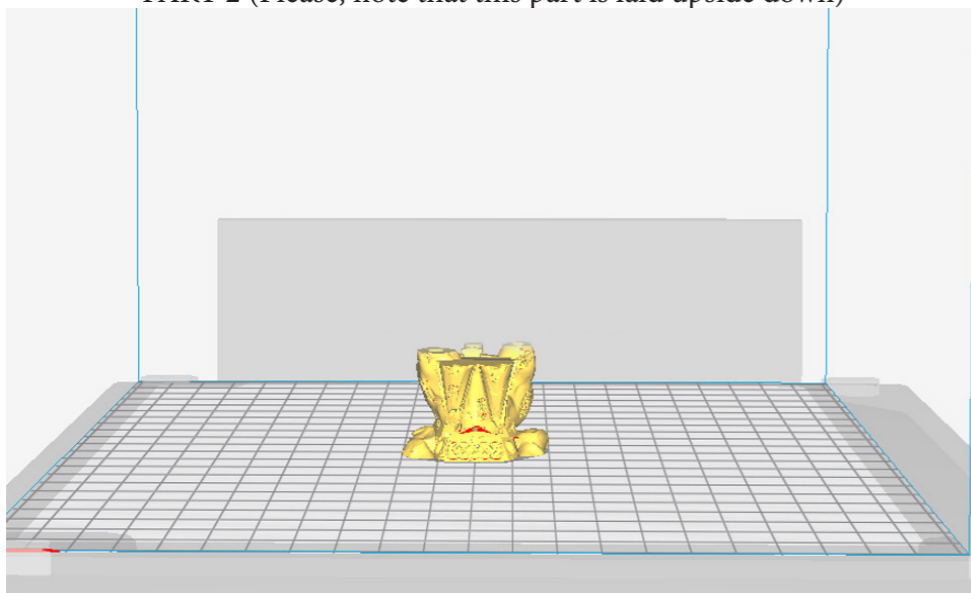

3D PRINTING

Print each part separately, laying it on the print bed as shown below (when opening each part in your 3D printing software, it should automatically be arranged as shown here). We recommend a layer height of 0.1mm (for the original size).

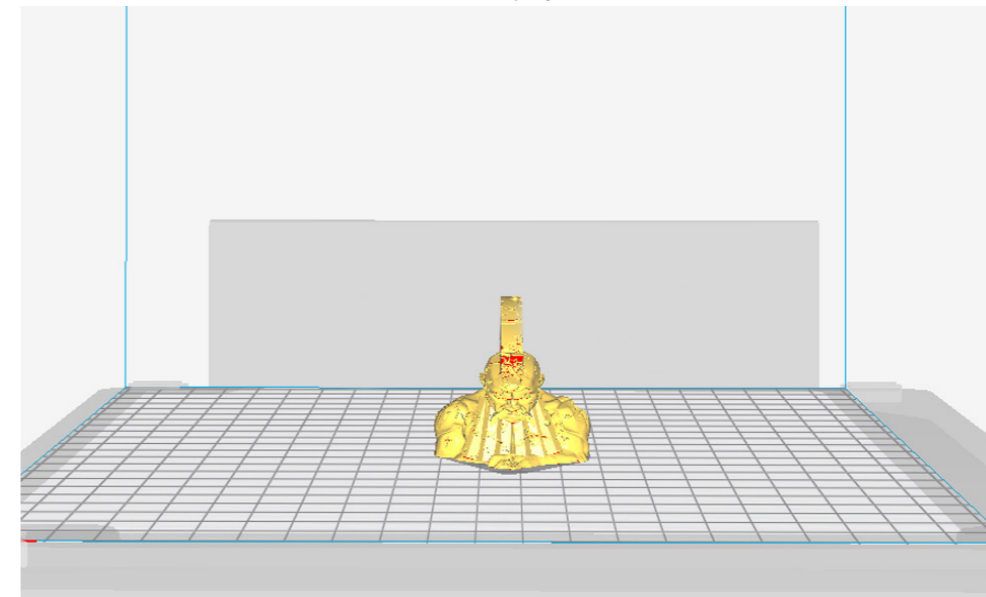

PART 1

PART 2 (Please, note that this part is laid upside down)

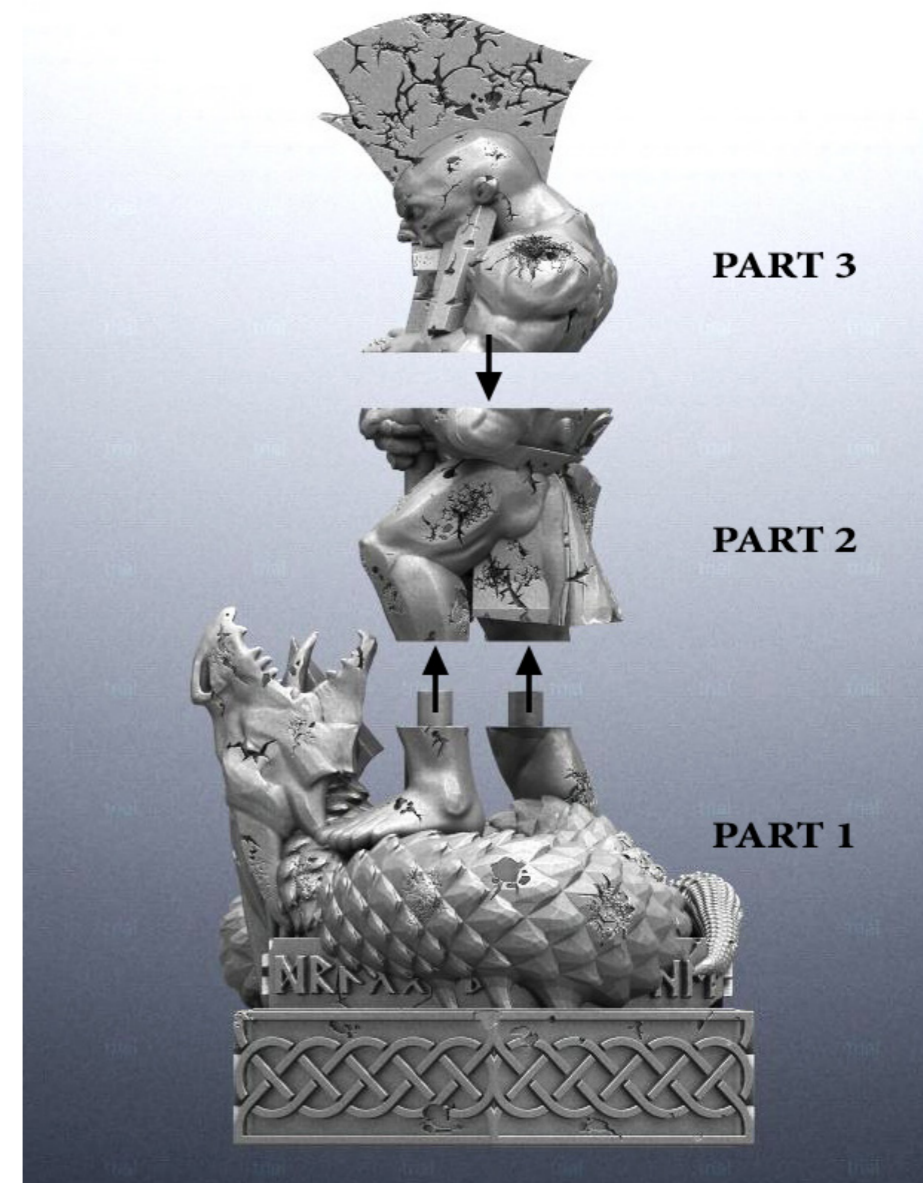

PART 3

ASSEMBLY

Glue the three parts together, as shown in the following image.

AGREEMENT FOR THE USE OF AoW STL FILES AND THE 3D MODELS CONTAINED IN AoW STL FILES.

By purchasing AoW STL files, you agree to the full terms of this agreement. If you do not agree with any of the terms of this agreement, please do not buy, or use our STL files in any way.

1 LICENSE

AoW grants you a non-transferable and non-exclusive license to 3D print the STL files for your personal use, in accordance with the following terms of use:

1.1 You can create as many 3D prints of the 3D models contained in the STL files as you wish for your personal use.

1.2 You will not be able to license, sell, rent, or commercially exploit in any way the STL files, or the 3D prints of the 3D models contained in the STL files.

1.3 You will not be able to manufacture, by any method, reproductions of the 3D prints of the 3D models contained in the STL files.

1.4 You will not be able to modify (except for scaling the model to print it at a different size than the provided one), duplicate or create derivative works of the 3D models contained in the STL files.

1.5 Except as expressly stated in this document, you may not distribute, copy, reproduce, republish, download, publish or transmit in any form or by any means the STL files or the 3D prints of the 3D models contained in the STL files.

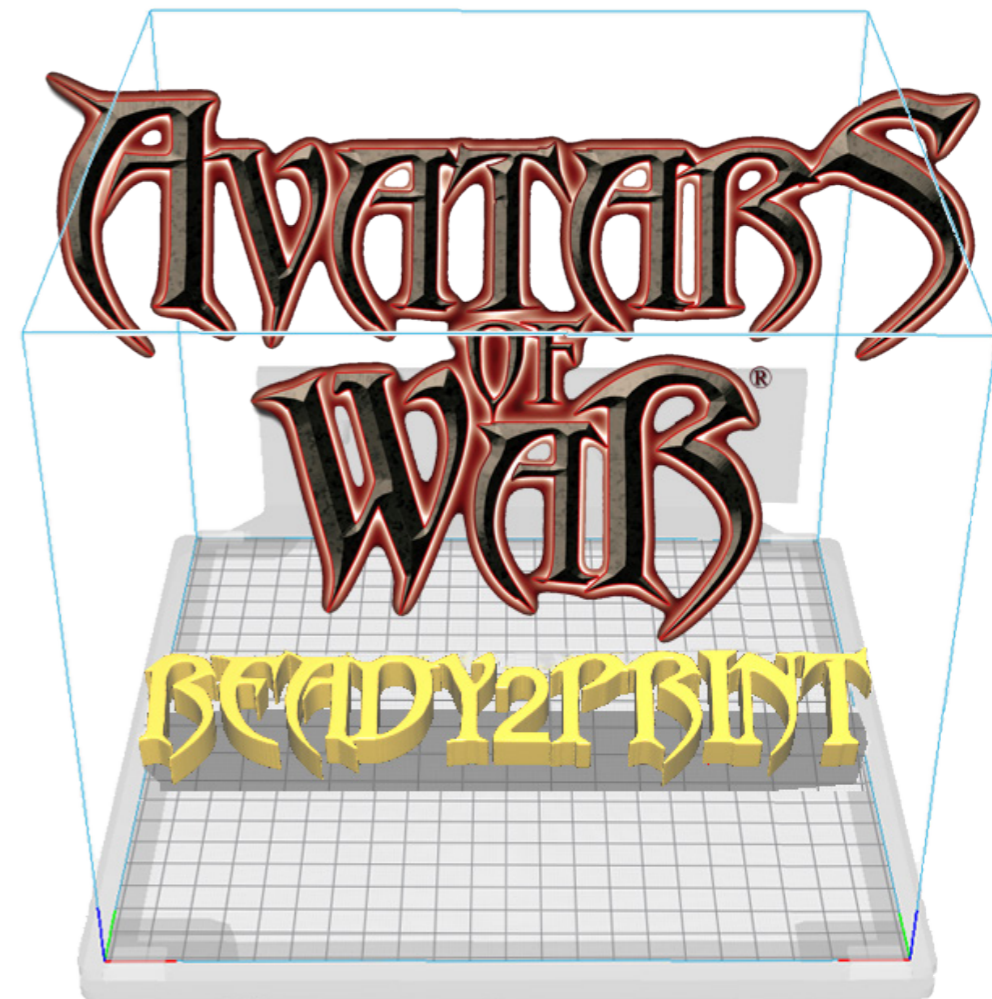

2. RESPONSIBILITY

2.1 AoW has no responsibility for the damage that may occur to the devices and 3D printers used for the 3D printing of AoW STL files.

2.2 AoW is not responsible for providing technical assistance for the use of STL files. Although we will gladly offer assistance to our customers, it is expected that the customer has a complete knowledge of their equipment and processes with respect to 3D printing.

3. DIGITAL WATERMARK

Each of our STL files contains a unique digital watermark, generated specifically for that file. This watermark helps to protect our digital intellectual property: in the case that an STL file or the 3D model contained in the STL file was used in any way not allowed by this license (such as shared on Internet or manufactured by means of mold-making and casting), the watermark would allow us to identify the source of said use, and to show our authorship of the file and the 3D model contained therein if necessary.
